

# Enterprise & Supplier Development Portal

In keeping with our aim to develop Small Medium and Micro Enterprises (SMMEs) in the areas which we mine, SERITI has developed an Enterprise and Supplier Development (ESD) PORTAL. This ESD portal will enable SERITI to have immediate visibility of the capabilities and development requirements of SMMEs in and around our local communities.

## The ESD Portal is envisaged to provide the following benefits:

- Harness the power of Technology to accelerate the development of local SMMEs
- Provide SERITI visibility of SMME development requirements
- Enable SERITI to improve the efficiency of our company registration process
- Provide local SMMEs with sight of business opportunities in a convenient way
- Improve the application process for business opportunities

## The ESD PORTAL will enable Local SMMEs to:

- Be able to learn more about SERITI and its operations
- Register their company details and the products/services they offer
- Update their profiles for potential inclusion in development programs
- View and apply for open business opportunities
- Contact us for support on the Portal when required

## How do you access the ESD Portal?

The platform has been designed to ensure simplicity and ease of use and can be accessed via desktop, laptop or mobile devices.

Below is the link to the Portal:
